

# Lists

You can organize items into ordered and unordered lists.

## Unordered Lists

To create an unordered list, add dashes (-), asterisks (\*), or plus signs (+) in front of line items. Indent one or more items to create a nested list.

- First item
- Second item
- Third item
- Fourth item

- First item
- Second item
- Third item
- Fourth item

- First item
- Second item
- Third item
- Fourth item

- First item
- Second item
- Third item
  - Indented item
  - Indented item
- Fourth item

## Unordered List Best Practices

Markdown applications don't agree on how to handle different delimiters in the same list. For compatibility, don't mix and match delimiters in the same list - pick one and stick with it.

## Adding Elements in Lists

To add another element in a list while preserving the continuity of the list, indent the element four spaces or one tab, as shown in the following examples.

- This is the first list item.
- Here's the second list item. I need to add another paragraph below the second list item.
- And here's the third list item
