

#197 Available color palettes with Matplotlib

1.0 BuPu

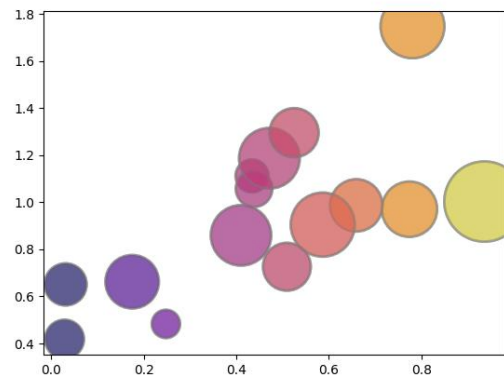

1.1 Inferno

Post #196 describes how to pick up a single color when working with python and matplotlib. This post aims to describe a few color palette that are provided, and thus make your life easier when plotting several color. There are 3 types of color palettes: Sequential, Discrete and Diverging. Here are a few explanations for each:

1.2 Plasma

2.0 Acknowledgements

Check out <https://python-graph-gallery.com/> for more wonderful examples of plots in Python.
