Test	test_write_emoji
Description	This test creates a PDF with an emoji in it. This test uses the Emojis enum, which conveniently holds a wide range of images mapped to their emoji-name.

It wasn't easy. But pText now offers (basic) support for 😃 . Find out more on the 🐙 -repo.

If you are working with a font that does not offer (color) emoji, you can now ask pText to insert the image corresponding to the emoji of your choice. Emoji offer some convenience methods to make it easier to interact with them as if they were text, rather than images.
