Test	test_write_tents_and_trees
Description	This test creates a PDF with a Table in it. This Table has some emoji in it.

4 TENTS AND 4 TREES

You get a grid that represents a campsite. There are a number of trees on the campsite. You as a campsite manager must find a spot for the tent of each visitor that meets the following requirements:

● A tree must be immediately next to each tent (diagonal is not allowed).

● In total there are as many tents as trees. So every tent has its own tree.

● The numbers outside the grid indicate how many tents there are in the relevant row or column.

● Tents never touch each other: neither horizontally nor vertically nor diagonally.

● A tent can make contact with multiple trees, but is only connected to one.
